01 Profile

Service Desk Analyst at Zinath Solutions, combining administrative experience (2022 – 2024) with hands-on IT support (2024 – present). Supports users and clients on Microsoft 365, Microsoft Entra ID, Intune and Azure, resolves tickets in Freshservice, and documents fixes for the team. BTEC Level 3 National Extended Diploma in IT, with cybersecurity covered in coursework, and Microsoft Certified in Azure AI Fundamentals. Building AI and automation skills through an apprenticeship. Seeking L2 service desk, IT support, Microsoft 365 support or junior IT administrator roles.

02 Experience

Service Desk Analyst — Zinath Solutions

2024 – Present

- Provide day-to-day technical and administrative support to clients and internal teams, resolving support tickets in Freshservice across system, data and web-related issues.
- Manage Microsoft Entra ID user accounts, licences and access permissions, while documenting incidents and escalating unresolved issues where necessary.
- Administer Microsoft 365 environments through the Microsoft Admin Centre: mailbox management, licensing and user configuration.
- Support Microsoft 365 security and access management, including authentication troubleshooting and user permissions.
- Configure and manage Microsoft Azure resources alongside Microsoft 365, supporting cloud administration and troubleshooting technical issues.
- Troubleshoot Microsoft Intune application deployment and configuration issues, investigating failures and testing potential fixes.

Assistant Administrator — Zinath Solutions

2022 – 2024

- General office administration and data management.
- Communicated with customers and clients.
- Prepared reports and spreadsheets in Microsoft Excel.
- Administered a website using Wix.
- Provided financial administration.

AI & Automation Practitioner Apprenticeship — QA

September 2026 – Present

- Developing skills in AI, low-code automation and business process improvement, including Microsoft Power Automate and Microsoft Copilot.
- Learning to design, test and optimise AI-driven solutions, with a focus on responsible AI, workflow automation and practical business applications.

03 Education

BTEC Level 3 National Extended Diploma in IT · D*D New City College 2023 – 2025

Gained hands-on experience across IT systems, web development, databases and other areas of technology, developing skills in programming, cybersecurity, project management and design, using industry-standard tools to tackle real-world challenges.

04 Skills

TECHNICAL SKILLS

- **Microsoft 365 Administration:** Microsoft 365 Admin Centre, user and mailbox management, licence assignment, account configuration and troubleshooting Microsoft 365 services.
- **Identity & Access Management:** Microsoft Entra ID, user account administration, onboarding and offboarding, access permissions and identity management.
- **IT Support & Troubleshooting:** Hardware and software troubleshooting, incident investigation, problem-solving, ticket resolution, issue escalation and end-user support.
- **Cybersecurity:** Cybersecurity fundamentals, identity security, access controls, email security and domain authentication using SPF, DKIM and DMARC.
- **AI & Automation:** Microsoft Power Automate, Microsoft Copilot, low-code automation, workflow improvement, responsible AI and AI solution testing.
- **Programming & Databases:** Python, HTML, Microsoft Access, database modelling and basic programming principles.

PROFESSIONAL SKILLS

- **Problem-Solving:** Investigating technical issues, identifying possible causes and working towards effective solutions.
- **Communication:** Explaining technical issues clearly to users and keeping clients informed about support requests.
- **Customer Service:** Responding professionally to user enquiries, understanding their needs and providing helpful support.
